

**49th Annual Course in Electrodiagnostic Medicine:  
Clinical and Electrical Evaluation of the Peripheral Nervous System**  
February 10-11, 2022 | Virtual Meeting

*(Preliminary Agenda/Subject to Change) - Page 1 of 2*

| PRE-CONFERENCE MODULES - MUST BE COMPLETED BEFORE CONFERENCE START |                        |           |
|--------------------------------------------------------------------|------------------------|-----------|
| Basic Conduction & Neuromuscular Junction (NMJ) Physiology         | Jason D. Berk, MD      | 1.5 hours |
| Motor Unit Physiology                                              | Shawn M. Peterson, DO  | 1.5 hours |
| Waveform Evaluation                                                | Kristofer J. Feeko, DO | 2 hours   |
| Late Responses: Uses & Pitfalls                                    | Ari C. Greis, DO       | 1 hour    |
| Anomalous Innervation to Reinforce Principles of Conduction        | Madhuri Dholakia, MD   | 1 hour    |

| Thursday, February 10, 2022 |                                                                                                          | 7:30AM - 3:30PM          |
|-----------------------------|----------------------------------------------------------------------------------------------------------|--------------------------|
| 7:30AM - 8:00AM             | <i>Registration Check In &amp; Exhibits</i>                                                              |                          |
| 8:00AM - 8:15AM             | Introduction/Q & A with Pre-Conference Modules                                                           | Shawn M. Peterson, DO    |
| 8:15AM - 8:30AM             | Q & A with Pre-Conference Modules                                                                        | Shawn M. Peterson, DO    |
| 8:30AM - 9:30AM             | Histologic vs Prognostic Classification of Nerve Injury with Associated Nerve Conduction Studies: Part 1 | Jeffrey A. Gehret, DO    |
| 9:30AM - 10:00AM            | <i>Exhibits and Stretch Break</i>                                                                        |                          |
| 10:00AM - 11:00AM           | Histologic vs Prognostic Classification of Nerve Injury with Associated Nerve Conduction Studies: Part 2 | Jeffrey A. Gehret, DO    |
| 11:00AM - 12:00PM           | Radiculopathies                                                                                          | Jeremy Simon, MD         |
| 12:00PM - 1:00PM            | <i>Lunch Break and Exhibits</i>                                                                          |                          |
| 1:00PM - 2:00PM             | Ulnar Neuropathies                                                                                       | Mitchell K. Freedman, DO |
| 2:00PM - 2:30PM             | <i>Exhibits and Stretch Break</i>                                                                        |                          |
| 2:30PM - 3:30PM             | Prognostication                                                                                          | Mitchell K. Freedman, DO |
| 3:30PM                      | <i>Closing Remarks for Day 1</i>                                                                         |                          |

| <b>Friday, February 11, 2022</b> |                                                                                                                                        | <b>7:30AM - 3:30PM</b> |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| 7:30AM - 8:00AM                  | <i>Registration Check-In &amp; Exhibits</i>                                                                                            |                        |
| 8:00AM - 8:15AM                  | Introduction/Q & A with Pre-Conference Modules                                                                                         | Shawn M. Peterson, DO  |
| 8:15AM - 9:15AM                  | Myopathies                                                                                                                             | Goran Rakocevic, MD    |
| 9:15AM - 9:45AM                  | <i>Exhibits and Stretch Break</i>                                                                                                      |                        |
| 9:45AM - 10:30AM                 | Peroneal/Tibial Neuropathies                                                                                                           | Michael J. Mehnert, MD |
| 10:30AM - 11:30PM                | Peripheral Neuropathy                                                                                                                  | Ericka Wong, MD        |
| 11:30PM - 12:15PM                | <i>Lunch Break and Exhibits</i>                                                                                                        |                        |
| 12:15PM - 1:15PM                 | Error: Identifying Causes of Unexpected Variability: Iatrogenic Error and How the Machine/Operator Can Influence Conduction Parameters | Andrew Dubin, MD       |
| 1:15PM - 2:00PM                  | Neuromuscular Junction Disease Cases                                                                                                   | Andrew Dubin, MD       |
| 2:00PM - 2:30PM                  | <i>Exhibits and Stretch Break</i>                                                                                                      |                        |
| 2:30PM - 3:00PM                  | Botulinum Toxin - History & Case Presentations of Indications and Risks: Part 1                                                        | Guy W. Fried, MD       |
| 3:00PM - 3:30PM                  | Botulinum Toxin - History & Case Presentations of Indications and Risks: Part 2                                                        | Andrew Dubin, MD       |
| 3:30PM                           | <i>Closing Remarks for Day 2</i>                                                                                                       |                        |
