present

4th Annual Jefferson Sialendoscopy Course

Wednesday, February 3, 2021
Live Virtual Meeting

Course Objectives

At the conclusion of this conference, participants should be able to:

- Develop strategies to treat and manage salivary gland disorders.
- Examine the advantages of sialendoscopy in patients for whom this minimally invasive procedure would be most appropriate.
- Use current evidence based practice guidelines in specific strategies to incorporate sialendoscopy and hybrid techniques into practice.
- Discuss the algorithm for management of stones based on size and location.
- Analyze the proper instrument handling and surgical techniques in sialendoscopy.
- Formulate the appropriate management plans based on potential complications of sialendoscopy and hybrid approaches.
- Apply course discussion outcomes and strategies to individual and/or team practices as part of a continuing improvement process.
