

3rd Annual Jefferson Women and Gastroenterology Health Symposium

**Friday, February 19, 2021
Live Virtual Meeting**

Course Objectives

At the conclusion of this conference, participants should be able to:

- Examine the diverse causes of rectal bleeding in women, and how they vary from men.
- Identify the gender differences that exist in the presentation and pathophysiology of drug related liver diseases and their impact on diagnosis, management, and treatment.
- Evaluate the role and effectiveness of vitamins and their deficiencies in various GI conditions.
- Recognize the manifestations present in females with IBD who contract COVID-19.
- Differentiate the effects of alcohol on the liver in males and females.
- Assess the role and effectiveness of surgical approaches to weight loss based on gender.
- Discuss the advances made by women in medicine, barriers that are faced by them today, and the measures that can be taken to make gender equity possible in medicine.
- Apply course discussion outcomes and strategies to individual and/or team practices as part of a continuing improvement process.
- Recognize individual roles and the roles of others in the healthcare team to interact as a dynamic collective unit in the delivering of health services to patients.
- Employ a communication strategy that merges observations, expertise, and decision-making of the healthcare team to optimize patients' care.
