

## *4th Annual Thomas Jefferson University - Seoul National University Endoscopic Skull Base Symposium*

*Saturday-Sunday, April 9-10, 2016*

### **Learning Objectives:**

*Upon completion of the course, participants should be able to:*

- Examine and discuss the most recent recommendations for management of skull base pathologies.
- Identify and describe the 3D anatomy of the skull base and neurovascular structures pertaining to the management of skull base pathologies.
- Develop strategies to treat benign and malignant lesions of the skull base.
- Review and discuss proper endoscopic instrument handling and surgical techniques.
- Perform techniques in endoscopic skull base surgery including clival, pituitary, anterior cranial fossa and infratemporal fossa approaches.
- Assess their individual practices in light of the information and discussions during the course, and identify specific strategies to implement as part of a continuing improvement process for their practices.
