

## **1st Annual New Jersey Neurovascular Symposium** *Innovations and Updates in Assessments, Treatment and Care* Thursday, November 1, 2018

### **LEARNING OBJECTIVES:**

**At the conclusion of this conference, participants should be able to:**

- Discuss risk assessment tools used to identify stroke and possible large vessel occlusion.
- Identify secondary stroke prevention measures for atypical stroke presentation.
- Describe the systems of care approach for optimal acute stroke management.
- Discuss emergency room workflow or process changes that should be considered as a result of the updated clinical guidelines for the early management of patients with Acute Ischemic Stroke.
- Review pertinent changes and current recommendations for the early management of Acute Ischemic Stroke.
- Identify posterior circulatory stroke symptoms on presentation.
- Review AHA/ASA updates related to endovascular management of patients.
- Outline the current treatment options for large vessel occlusions.
- Specify stroke patients that may benefit from endovascular therapy.
- Illustrate posterior circulatory arterial system anatomy.
- Assess the benefits of transport protocols for stroke patients.
- Provide guidance to practitioners on the role of interfacility transport processes.
- Assess the benefits of interfacility transfer for acute stroke patients.
- Assess their individual practices in light of the information and discussions during the course, and identify specific strategies to implement as part of a continuing improvement process for their practices.
