

2nd Annual New Jersey Neurovascular Symposium

Innovations and Updates in Assessments, Treatment and Care

Friday, November 1, 2019

LEARNING OBJECTIVES:

At the conclusion of this conference, participants should be able to:

- Recognize and discuss assessment tools used to identify stroke and large vessel occlusion.
- Assess the benefits of a Mobile Stroke Unit in acute stroke care.
- Describe and explain a stroke bundle and its utility in stroke care.
- Identify stroke readmission risk factors, recognize and apply risk stratification tools.
- Describe and discuss the role of the cardiologist in stroke management.
- Discuss and describe the impact of care coordination on critical stroke and neurosurgical patients using a collaborative model of telemedicine in Neuro-ICU.
- Review the latest evidence based optimal medical and surgical management of the acute stroke patient.
- Review updates related to endovascular management of patients with ischemic stroke.
- Evaluate recommended imaging techniques for patients who present with symptoms of stroke, and list the initial imaging modalities utilized in acute stroke evaluation.
- Discuss current treatment guidelines for carotid artery disease.
- Describe risk and benefit of open endarterectomy, radial artery and femoral artery approaches.
- Assess their individual practices in light of the information and discussions during the course, and identify specific strategies to implement as part of a continuing improvement process for their practices.
