

## *10<sup>th</sup> Annual Diabetes Symposium: New Advances & Trends*

Friday, October 15, 2021

### Course Objectives

At the conclusion of the program, the participants should be able to:

1. Differentiate older agents from newer ones in diabetes pharmacologic treatment strategies.
2. Examine the various mechanisms of action, benefits, and side effects of new diabetic therapies.
3. Interpret the new ADA 2021 guidelines.
4. Evaluate the importance of SGLT2-I in improving cardio-renal outcomes in diabetes.
5. Illustrate the impact of Covid-19 on the diabetic patient.
6. Examine the importance of new technology (glucose sensors) in managing diabetes.
7. Discuss nutrition strategies in diabetes for optimal patient health outcomes.
