

40th Advances in Gastroenterology
June 18, 2022
In Person Meeting
Presented by Thomas Jefferson University

Course Objectives

At the conclusion of the program, the participants should be able to:

- Utilize the newest approaches to managing esophageal and gastroduodenal disorders.
- Develop appropriate management plans for small bowel and colonic disorders.
- Discuss current and future colorectal cancer screening and surveillance strategies.
- Assess key advances in gastroenterology, their clinical impact and implications for current and future research.
- Summarize current knowledge on liver transplantation, solitary liver mass, and NAFLD.
- Describe interprofessional team strategies for improving care coordination and communication to improve patient outcomes.
