

Pancreas & Related Cancers: What's New in 2022?

Friday, June 3, 2022

Learning Objectives

At the conclusion of this conference, participants should be able to:

- Assess the current state of pancreatic cancer in the US and the challenges associated with diagnosis, management, and treatment of this disease.
- Describe the molecular underpinnings and drivers of pancreatic cancer.
- Evaluate the surgical treatment options available and the risks and benefits associated with each.
- Analyze the various neoadjuvant and adjuvant therapies available, and the applications, implications, and outcomes of these treatment strategies.
- Describe therapies used in the treatment of pancreatic cancer such as post-resection and radiation.
- Discuss the current novel treatment strategies for locally advanced pancreatic cancer.
- Examine the benefits of palliative therapies such as pharmacologic cytotoxicity and alternative treatment methods.
